

Germany Readiness Suite

The one-day web app that turns "Am I ready for Germany?" into a real number, a clear gap, and a 90-day plan, then hands the coach a warm conversation. This guide is for Ameen and the team.

EVENT

Germany Career Summit

DATE

20 June 2026, Chennai

LIVE AT

germanysummit.sirahagents.com

01 What it is, and why it exists

- **One link, three tools, one score.** Every attendee gets a personal readiness profile keyed to their email.
- **The objective:** move each person from inspiration to action while they are still in the room, in under 10 minutes.
- It does not ask for stage time. It powers the blocks already on the agenda.
- It feeds the back end: the app exposes the gap, the accountability sprint closes it.

THE GOLDEN RULE

The app **diagnoses**. The coach and the sprint **deliver**. It never writes a CV or hands over the finished answer. It shows the gap, then points to you. This is by design, and it protects the offer.

02 Why it earns its place next to the paper kit

The printed Worksheet and 90-Day Visual Roadmap stay. The app only does what paper cannot.

Compute

A real, consistent 0 to 100 score and a five-point radar, the same way for every person.

Aggregate

The whole room on one screen, live: average readiness, gaps everyone shares, the shift across the day.

Personalize at scale

A CV read and a 90-day plan tailored to each person, 300 at once, in minutes.

Follow home

Results keyed to email so people can return to them, and the lead is enriched for follow-up.

03 The three tools

MODULE 01 / REALITY CHECK

A number they cannot argue with

- 10 honest questions across 5 dimensions: Profile, Strategy, German & Skills, Mindset, 90-Day Plan.
- Gives a 0 to 100 Germany Readiness Score, a pentagon radar, their archetype, and the one gap holding them back.
- Scored on our server, so the room view and the record are the source of truth.

The screenshot shows the 'Reality Check' module interface. At the top, there's a navigation bar with 'Germany Readiness Suite', 'Reality Check', 'CV & LinkedIn Lab', and '90-Day Roadmap'. The main heading is 'Where do you actually stand on Germany?'. Below it, a subtext says 'Ten honest questions across the five dimensions that decide whether a German recruiter calls back. No motivation, no flattery - a mirror, and a clear picture of the one thing to fix first.' There are three bullet points: 'Takes about 90 seconds', 'A 0-100 Germany Readiness Score + your pentagon radar', and 'Answer honestly - it only helps if it's true'. A yellow button labeled 'Start the Reality Check' is prominent. At the bottom, there's a footer with a disclaimer: 'A mirror, not a shortcut. The suite diagnoses, scores, and points you to the fix - the work still happens with the coach, on stage, and in the sprint. Additive to your paper Germany Readiness Worksheet.' and a sidebar with '22 CONSULTANTS - GERMAN NOTE', 'MMA Hall, Chennai', and '20 June 2024 - 10:00 - 16:00 IST'. The URL 'germanysummit.sirahagents.com/reality-check' is at the very bottom.

MODULE 02 / CV & LINKEDIN LAB

What a German recruiter sees in 8 seconds

- Upload a CV as PDF or Word, paste the German job they want.
- Returns an ATS match score, a recruiter-style keyword checklist, German-format checks, and the weak bullets, named not rewritten.
- A second tab does the same for their LinkedIn profile.
- Re-analyze after fixes and it shows the lift from the last attempt.

The screenshot shows the 'CV & LinkedIn Lab' module interface. At the top, there's a navigation bar with 'Germany Readiness Suite', 'Reality Check', 'CV & LinkedIn Lab', and '90-Day Roadmap'. The main heading is 'What a German recruiter sees in 8 seconds.' Below it, a subtext says 'Paste your résumé and the job you're targeting. You'll get an ATS match score, the keywords you're missing, and the bullets that are holding you back - named, not rewritten. The fix is yours to make.' There are two sections: 'YOUR RESUME' with a text area for pasting the resume and a file upload button, and 'TARGET GERMAN JOB DESCRIPTION' with a text area for pasting the job description. Below these are optional sections for 'LINKEDIN "ABOUT"' and 'EMAIL'. A yellow button labeled 'Diagnose my CV' is at the bottom. At the bottom, there's a footer with a disclaimer: 'A mirror, not a shortcut. The suite diagnoses, scores, and points you to the fix - the work still happens with the coach, on stage, and in the sprint. Additive to your paper Germany Readiness Worksheet.' and a sidebar with '22 CONSULTANTS - GERMAN NOTE', 'MMA Hall, Chennai', and '20 June 2024 - 10:00 - 16:00 IST'. The URL 'germanysummit.sirahagents.com/cv-lab' is at the very bottom.

Twelve weeks, front-loaded on the weak spots

- Builds a week-by-week plan from their score, front-loaded on their two weakest dimensions.
- Mirrors the physical 90-Day Visual Roadmap, and points to the Roadmap Reveal and the sprint.
- Downloadable as a PDF. Built once per person, so it stays their plan unless the team re-enables it.

Germany Readiness Suite

Reality CheckCV & LinkedIn Lab90-Day Roadmap

Start Here

MODULE 0390-DAY ROADMAP

Turn your Reality Check into a week-by-week plan.

We build a directional 90-day plan from your readiness profile - and your CV gaps. If you've run the Lab - front-loading the two dimensions dragging your score down. A map, not the finished work.

EMAIL
Use the same email as your Reality Check so we can read your profile.

TARGET ROLE (OPTIONAL)
Sharpen the plan: e.g. "Backend Engineer, Munich"

The role you're aiming for

Generate my 90-Day Roadmap →

Directional only. The roadmap shows the path - the accountability sprint is where you walk it, with the coach.

A mirror, not a shortcut. The suite diagnoses, scores, and points you to the fix - the work still happens with the coach, on stage, and in the sprint. Additive to your paper Germany Readiness Worksheet.

RZ CONSULTANTS - GERMANY NOTE
MMAF Mail, Channel
20 June 2024 - 10:00 - 16:00 GMT

04 How it powers your day

The suite slots into the agenda. It does not add to it.

TIME	AGENDA BLOCK	WHAT THE APP POWERS
10:00-12:30	Reality Check + Live CV Transformation	Reality Check score, the live room screen, and the CV & LinkedIn diagnosis.
12:30-1:30	Lunch and networking	People retake on arrival, the room screen fills up.
1:30-3:00	Roadmap Reveal + Success Stories	The 90-Day Roadmap, and the lead-in to the accountability sprint.
3:00-4:00	Q&A + Personal Action Plan	End-of-day re-score and the score lift across the day on the big screen.

HOW IT FEEDS THE SPRINT

Free content brings them in. The 999 summit is the front end. The app makes the gap personal and undeniable, which is the natural set-up for the **accountability sprint** on the back end. When someone is rattled by their score, that is the cue.

05 Running it: three moments, three links

- Each moment has a clean link. Share it as a link, or as the QR code below, whichever fits the screen or the message.
- The link decides the phase, not the clock. The short links tag it automatically.
- To capture a real before/after, turn on **"Allow everyone to retake"** in admin during the arrival and end-of-day pulses, so people can score again with the same email.

Pre-event

/reality-check

On arrival

/arrival

End of day

/end-of-day

Print these on the registration desk and the closing slide. Each one tags its phase on its own.

06 The big screen: the Room, live

GERMANYSUMMIT.SIRAHAGENTS.COM/ROOM

Open this on the big display during the live blocks. It refreshes on its own.

- **Average readiness**, the room radar, tier breakdown, archetypes, and a score distribution.
- **Score lift across the day**: same people, first take vs latest. The honest before/after the room actually moved.
- Tabs filter the view by **Pre-event, On arrival, End of day**.
- Use it on stage: "this room's average is 54, and the number one gap is Strategy."

07 Admin controls

GERMANYSUMMIT.SIRAHAGENTS.COM/ROOM/RECORDS, OPENS WITH THE ADMIN KEY

Your private control room. Every entry shows name, email, phone, session, score, tier, archetype, the modules they finished, and the time in IST.

Retake control

- **Allow or lock one person.** A finished Reality Check locks that person by default, matched on email and on phone.
- **Allow everyone to retake.** One global switch. Turn it on for the arrival and end-of-day pulses so the room can score again, then turn it back off.
- **Reset all locks.** Clears everything back to a fresh state.

Roadmaps and records

- **Unlock a new roadmap.** Plans are one per person. Grant a regenerate when someone genuinely needs a fresh one. It is used up on the next build.
- **Delete a record.** Remove a test entry or a duplicate.
- Treat the admin key like a password. Keep it off the screen and out of public hands.

08 What the team must provide: the AI key

- The CV diagnosis, the LinkedIn read, and the 90-day roadmap are generated by **Anthropic's Claude AI**.
- B2 must provide an **Anthropic API key** and pay for usage. It is a paid, pay-as-you-go service, billed by Anthropic, not by us.
- The Reality Check score works without it. The three AI tools will not run without a funded key.

Set it up once:

- ✓ Create an account at console.anthropic.com and add a billing method.
- ✓ Create an API key.
- ✓ Paste it into the app hosting (Vercel) as `ANTHROPIC_API_KEY` and redeploy.

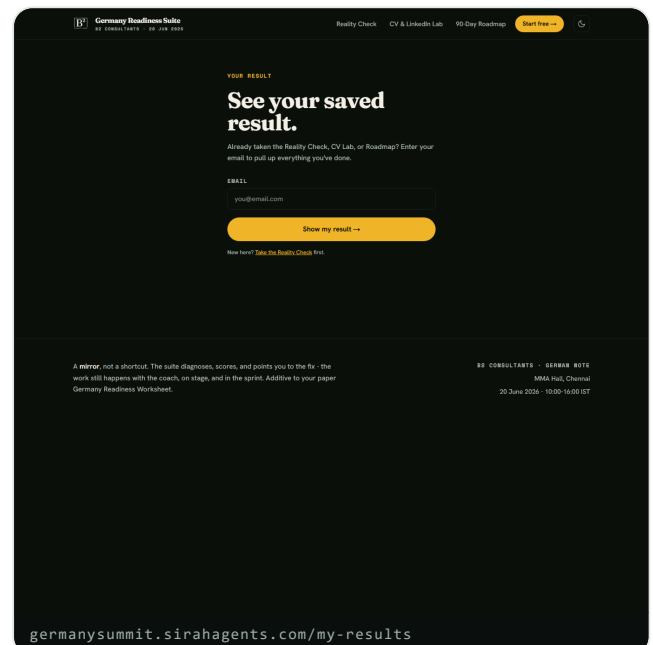

ROUGH COST FOR THE DAY

Each analysis costs a few US cents. For a 300-person event where people run the CV Lab and the roadmap, budget roughly **USD 30 to 60** (about 2,500 to 5,000 rupees), with a buffer. Built-in prompt caching keeps this low.

Keep a small top-up on the account so it never runs dry mid-event. Treat the key like a password.

09 People can find their own results

- Anyone can look up everything they did, using the same email, at **/my-results**.
- Score, radar, CV and LinkedIn reads, and their 90-day plan, all in one place.
- Good for the WhatsApp follow-up: "open your results, here is your next step."

10 Event-day checklist

- ✓ Anthropic key funded and live in the hosting environment.
- ✓ Strong admin key set, shared only with the team.
- ✓ Pre-event link sent in the reminder email.
- ✓ Arrival and end-of-day QR codes printed and on the closing slide.
- ✓ "Allow everyone to retake" turned on for the arrival and end-of-day pulses.
- ✓ The Room screen open on the big display during the live blocks.
