

Running the Germany Readiness app on the day

One job: turn the room's own answers into a number on the screen, then into enrollments. This is the operator guide — which screen, which moment, who.

germanysummit.sirahagents.com • 20 June 2026 • MMA Hall, Chennai

01 Four screens, one link

SCREEN	ADDRESS	FOR
Reality Check	/reality-check	Attendees take it on their phone. 10 questions + consistency and years.
The Room	/room	Big screen. Live averages, radar, the room's shift, and the seat counter.
Live answers	/room/live	The section-by-section reveal Ameen presents from. Has "Stage mode".
Records	/room/records	Admin. Intent list, enrollments, follow-up export, retake controls.

The three /room screens open with the **admin key**. Bookmark them with ?key=YOURKEY so they open in one tap. Keep the key off the projector.

02 Before the day — Riyaz sets up

- ✓ Anthropic API key funded (the CV/roadmap AI needs it; Reality Check works without it).
- ✓ Strong admin key set; shared only with Ameen, tech, and the closer.
- ✓ Guided Mode capacity set (8, or 10) and Solo target (25) in Records.
- ✓ Pre-event link in the reminder email/WhatsApp so people arrive already scored.
- ✓ Open the QR/link from 3 phones; confirm a test submission lands in Records.
- ✓ Bookmark /room?key=, /room/live?key=, /room/records?key= on the stage laptop and a tablet.

03 The one rule of the reveal

Hands first, screen second. Ameen still asks for hands in the debrief. Then the screen shows the exact number as the punch: *"You saw the hands — here is the truth: 78% of this room can't state the problem they solve."* The screen amplifies the moment; it never replaces the hands.

Stage mode shows one big stat per question (the share who chose a weaker answer) with that line ready to read. Toggle it with the **Stage mode** button or the **S** key; move sections with the **arrow keys**.

04 The timeline — when Ameen uses what

TIME	AGENDA	MOMENT	APP ACTION	WHO
9:30	Registration		Attendees scan the QR / open the link and take the Reality Check.	REG TEAM
10:00	Opening + stand-up		The Room on screen behind Ameen (or a holding slide). No reveal yet.	TECH
10:30	Section 1 debrief — Profile		Live answers → Section 1. Hands, then Stage mode for the big %.	AMEEN / TECH
11:05	Section 2 — Strategy		Arrow to Section 2. Reveal the "50 applications, 0 replies" numbers.	AMEEN / TECH
11:35	Section 3 — Skills & German		Arrow to Section 3. Reveal who is waiting on a certificate.	AMEEN / TECH
12:05	Section 4 — Mindset (the peak)		Open the Mindset pulse : average consistency, % below 5, 2+ years.	AMEEN / TECH
12:30	Lunch		Records → High intent only + Sort by intent to pick testimonial people.	VIDEO TEAM
1:30	Section 5 + testimonials		Live answers as needed; The Room shows the day's shift.	AMEEN / TECH
2:30	The pitch		The Room on screen — the seat counter is visible as scarcity.	TECH
2:50	Buying window		Payment team marks each buyer in Records; names + count update on screen.	PAYMENT
4:00+	After close		Records → Export CSV (high-intent + follow-up). Send that night.	RIYAZ

Stage mode: the Gap → Pain reveal, one big number per question.

Section 4: the room's consistency and how long they've been stuck.

05 The buying window — two programs, live names

- Two programs sell: **Guided Mode** (the 8-seat scarcity hero) and **Solo Mode** (the ~25 downsell). Payment is on-spot UPI.
- When someone pays, the payment team finds them in **Records** (use the search box), and taps **G** (Guided) or **S** (Solo) in their row.
- The big screen updates within seconds: "**N left of 8**" for Guided, the Solo count, and the **real names** of who just joined — live social proof.
- To change capacity, edit the **target** box on the Guided or Solo card (e.g. 8 to 10).

WHERE TO UPDATE THE SEATS

Records page → the **Live enrollments** card and the **G / S** buttons in each row. "Seats left" on the room screen is just target – enrolled. Tap on a tablet; Ameen stays on stage.

The Room: Guided seats left + Solo count, with buyer names.

Records: mark each buyer (G / S), search, intent list, follow-up.

06 Who does what

Ameen

Presents from Live answers. Cues the screen ("show me the room"), reads the big number, runs the Mindset pulse at the peak. Never touches admin.

Tech (Karthick)

Runs The Room and Live answers on the projector. Advances sections (arrows) and toggles Stage mode (S) on Ameen's cue.

Payment team (Asma)

Records on a tablet. Searches each buyer, taps G or S as UPI payments land. Watches the seat count.

Riyaz

Sets up before, monitors during, exports the high-intent + follow-up list after, and sends the personalized messages that night.

07 What Riyaz does — start to finish

BEFORE

- Fund the Anthropic key; set a strong admin key.

DURING

- Make sure Live answers is on the right section before each debrief.

- Set Guided capacity (8/10) and Solo target (25).
- Put the pre-event link in the reminder; test from 3 phones.
- Bookmark the three /room screens with the key on the stage laptop + a tablet.

- Confirm the seat count is being updated as payments come in.
- Keep an eye on the room count and that submissions are landing.

AFTER

- Records → Export CSV (the high-intent list + ready follow-up per person).
- Send the personalized follow-ups that night; share the hot list with Ameen.

08 Quick reference

- **Keyboard (Live answers):** ⬅ ➡ sections · Ⓢ stage mode.
- **Deep link a view:** /room/live?key=...\$ion=4&stage=1
- **Update seats:** Records → Live enrollments card + G/S per row.

- **Find a buyer fast:** Records → search box (name/email/phone).
- **Allow retakes** for arrival/end-of-day pulses: Records → toggle, then off.
- **Follow-up:** "copy" per row, or Export CSV for all.
